Work experience

Opendoor 2024-04 - present

Senior Operations Associate

- Build daily operational workflows across external vendors, municipalities, and internal business teams, ensuring adherence to operational timelines, service expectations, and business requirements.
- Prepare and maintain **operational reports, backlog analyses, KPI dashboards, and performance updates** to provide leadership with visibility into workflow status and operational performance.
- Monitor key operational metrics and maintain **98% SLA adherence** while managing **150+ compliance cases monthly** across high-volume workflows.
- Perform data validation and review operational information to maintain reporting accuracy, consistency, and data integrity.
- Identify workflow gaps, recurring issues, and opportunities for **process optimization and standardization** to improve operational efficiency.
- Support workflow automation initiatives using **Gumloop AI, Claude AI, Jira, and Salesforce**, helping reduce repetitive manual activities and streamline operational processes.
- Coordinate with vendors, municipalities, and internal stakeholders to resolve operational exceptions and ensure timely completion of activities.
- Maintain structured communication and information flows across multiple stakeholders through high-volume email and operational channels.
- Mentor peers on the effective use of workflow automation and Generative AI tools to improve productivity and process efficiency.

Sutherland Global Services 2023-11 - 2024-03

Senior Process Associate

- Managed customer account and case workflows through enterprise CRM systems while maintaining data accuracy and completeness.
- Performed data validation and ensured accurate information capture across operational case records.
- Managed internal and external communication workflows to support timely resolution of complex cases and operational issues.
- Maintained detailed case documentation and prepared structured summaries for stakeholders and specialized support teams.
- Coordinated escalations and exception handling to support timely resolution and maintain service quality.

Senior Analyst

- Prepared **daily and weekly MIS reports and reconciliation summaries** for management review, ensuring timely and accurate reporting.
- Performed data validation, reconciliation, and data cleansing across **300+ financial transactions monthly**, maintaining data integrity and operational accuracy.
- Analyzed transaction-level information to identify discrepancies and operational exceptions and supported timely resolution.
- Coordinated with multiple business units to resolve operational exceptions and provide real-time status updates to relevant stakeholders.
- Maintained operational controls and reporting timelines to support consistent business performance.
- Served as a Subject Matter Expert for **SAP ERP transaction processing**, providing process guidance and training to junior team members.

Poorvika Mobiles Pvt Ltd

Junior Executive

- Managed service workflows and customer account lifecycles using **Salesforce CRM**, ensuring accurate data logging and timely case closure.
- Managed internal and customer communication queues while maintaining response timelines and structured information flow.
- Tracked operational activity and generated structured performance reports to support supervisors in monitoring workflow output.
- Maintained accurate CRM records and supported day-to-day operational reporting and service management.
